- o Worked on the production mobile application along with testing the user experience and existing features of the app.
- o Implementing new features in the app, **providing apk build for testing**, worked with victory, Mapbox and RN-Cli.

PROJECTS

Google-Keep Clone: Take notes on web and mobile *April 2022*
[React, Node, MongoDB, GraphQL, Tailwind]   https://keep--notes.vercel.app
- o Inspired by the official google keep app which is a highly optimized notes taking application, it's an excellent productivity tool for anyone who wants to take quick notes anywhere on web or mobile.
- o Used GraphQL JavaScript server to prevent under/over fetching of data in user's interaction and also to improve API gateway performance by 14 percent for use case.
- o Introduced tools for dynamic GraphQL schema generation. Used Tailwind to clone the same UI as official Google keep.

RN-News: News application *October 2022*
[React Native, News-api, Typescript]   https://github.com/sketchomania/news-app
- o Developed a react native application to search news by topics, search news by category, bookmark and vote feature.

Winsight: Get Weather Insights *September 2021*
[Node.js, Express, Handlebars]   https://sketch-weather-application.herokuapp.com/about
- o Managed 2 API endpoints together to improve accuracy in search results by 33 percent. As a result, on this site one can search any region of the globe to get weather information.

C-Note : cli note taker with date *October 2021*
[Node.js, cli script based]
- o Developed a CLI tool that helps in managing notes
- o User will be able to perform CRUD operation and mark tasks accordingly

YT-Scroll *May 2021 – Aug 2021*
[React Native, Ajax, Youtube-api]
- o https://github.com/sketchomania/yt-search-scroll

RELEVANT SKILLS
